James Huynh

Toronto, ON, Canada • on.jamesh@gmail.com • 437-370-7773 • LinkedIn

Professional Summary

Software developer with a Computer Science background building full-stack applications, AWS pipelines, and Python workflows. Skilled in JavaScript, Python, React, Rails, PostgreSQL, Docker, and cloud services.

Skills

Languages: **JavaScript, Ruby, Python, Java, SQL, C, PHP, R**
Technologies: **React, Rails, PostgreSQL, MariaDB, Node.js, Redux, Git**
Cloud/DevOps: **AWS (Kinesis, Lambda, ECS, EC2, API Gateway), Docker, Linux, GCP, Nginx**

Education

George Brown Polytechnic — Sep 2025 – Aug 2026
Ontario College Graduate Certificate, Health Informatics — Toronto, ON

University of Toronto — Sep 2016 – May 2023
Honours Bachelor of Science, Computer Science — Toronto, ON

Experience

Full Stack Developer at **Overbond** — May 2019 – Aug 2020
Toronto, ON

- Developed full-stack Rails features using **React**, Redux, and **PostgreSQL**
- Built real-time **AWS** data pipeline components with **Kinesis** and **Lambda** using financial market data to produce analytics within five seconds
- Overhauled **Python** workflows deployed with **Docker** in **Amazon ECS**
- Implemented real-time dashboards with **WebSockets** and **API Gateway**
- Supported production systems across application, database, market data integrations, and AWS components in a small engineering team
- Scoped client goals, platform infrastructure, and tasks in **Confluence** and **Jira**

Embedded Software Designer at **ExtentCom** — May – Aug 2018
Richmond Hill, ON

- Developed command-line interfaces, scripts, and cryptosystems for wireless communication tools like radios, power meters, and switches with **C** and **Perl**
- Implemented network error checks and crypto algorithms like CRC and RSA

Projects

HiT4EMR: OpenEMR Implementation Project — May – Aug 2026
Toronto, ON

- Managed OpenEMR 7.0.2 on **AWS EC2** using **Docker**, **MariaDB**, and **Linux**, including backups, synthetic data imports, and environment maintenance
- Built a **PHP OpenEMR analytics module** tracking cohort activity and chart sessions
- Supported a shared **30+ student** OpenEMR environment across testing and deployment
- Tested interoperability using FHIR R4 API access with OAuth2 authentication and synthetic HL7 v2 laboratory workflow simulations

Steam Badge Aggregator — Jul 2018
Toronto, ON

- Built a **JavaScript** web application using the Steam Store API to collect pricing data for 8,000+ video games with **Python**
